

Our mail server holds a total of 64 million CLEAN e-addresses We have 16 million GOOD e-addresses. Depending upon the day and IP address used, many of the 21 million blocked addresses then become deliverable GOOD addresses . The timed out addresses also become deliverable GOOD addresses on a different day using a different sending IP .

We constantly buy new lists, clean and update our lists . After 5 bounces the e-address is deleted from our records.

For all our e-addresses we have corresponding name , address including zip code, and phone number. For an additional fee we can reverse search our database and provide our clients with e-address by zip code, TARGETING wealthy neighborhoods, apartment buildings, condo's . We can provide a TARGETED e-mail campaign by street address if requested.

## Global List Stats

Scanning Completed

**Good** 15955056 **Blocked** 21598503 **Timed Out** 6634623 **Unknown** 361118 **Address does not exist** 9667704 **Bad Domain** 1160022
